

Lifting Magnets

Since 2006
As per Technology from
M/S Rotary Engineering, UK

Electro Zavod lifting magnets enable you to lift and move steel without using slings, ropes, etc.

Benefits of Electro Zavod lifting magnets:

- Low Dead Weight
- Large Lifting Capacity
- Unequalled rates of lifting capacities to magnet weight
- Relatively low power consumption
- Stainless steel base plate with stiffening bars
- Welded-in base plate – weather proof, rigid, less complex
- Easily exchangeable wear part for the central poles
- Lower total cost of ownership- considering purchase, running and maintenance costs

Electro Zavod makes the following lifting Magnets:

Rectangular Lifting Magnets :

- 18" Series/ Copper Wound 220V DC
- 18" Series/ Aluminum Wound 220V DC
- 24" Series/ Aluminum Wound 220V DC

Circular Lifting Magnets :

- Standard Type
- Heavy Duty Type
- Heavy Duty Deep Field Type

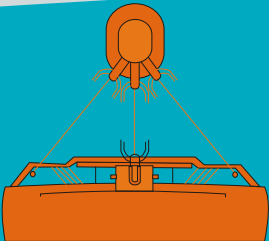

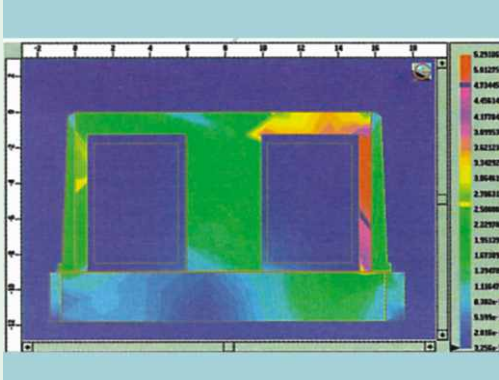

Consultation & Design:

Electro Zavod can survey your requirements and help to select the right equipment. If you require non-standard equipment, we can manufacture specific to your needs.

We can make Old magnets New, for example:

Rewinding with Aluminium instead of Copper.
